

Features:

- Maximize Floor Space
- Customizable for variety of product shapes and sizes.
- Large amounts of products can be condensed into smaller amount of vertical space.
- Easier to locate products
- Customizable locating software
- Flat panel display
- Locating software will free up employees time
- Market products right to the customer at the point of sale.
- Run advertisements using large overhead monitor or the user interface touch screen monitor
- Many commercial applications

The CarrySale vertical carousel unit is customizable by the use of a wide variety of audio visual marketing capabilities. The right combination of these benefits and features are revolutionary, will increase sales, and give customers a fun & memorable experience.

Safety and Technical:

The CarrySale unit has a triple redundant safety system incorporating mechanical and infrared safety devices to ensure your customer a safe and reliable experience. The unit is fully approved to UL standards and can be wired for 110 or 220 volt AC. It can also obtain network access through ethernet or wireless (802.11n). The unit is designed for easy serviceability and long life. Most components are modular and “plug and play” allowing, again, for easy maintenance. The unit can be incorporated into existing inventory systems and has RFID capabilities.

Other Potential:

The CarrySale has the ability to act as a kiosk that can be used as a tool to help a customer locate any product in a given store. This can be extremely useful especially in conjunction with the units marketing / advertising abilities. The unit can be interfaced with an almost endless amount of networks, hardware devices, security devices and inventory systems due to its universal Windows platform and modular design. Bar code scanners, help buttons and RFID scanners are all options that are not a problem with the CarrySale unit. Modular components and the minimization of wearable parts in addition to a design that was executed with ease of maintenance at the forefront makes the CarrySale easy to service. The unit boasts a high degree of reliability. The unit can also be used in a variety of commercial applications including warehouse, storage and assembly areas.

The Physical Unit:

The unit can be customized in any available color or finish with the addition of decals and/or logos. The unit can be engineered to fit a wide variety of product weights and sizes. The unit size can be customized for heights up to 30 feet, widths up to 4 feet, and a unit capacity of 1400 pounds.

Once we have your interest and know your needs we can design a unit that works for you.
